Subject Index

Acid strength
Para-selectivity of zeolites with MFI structure: Difference between disproportionation and alkylation 51
Acid-base additives
Some fundamental and practical aspects of the ammoxidation of alkylbenzenes 103
Acidity
Surface modified niobium oxide catalysts: synthesis, characterization, and catalysis 179
Active carbon
Decarbonylation of methyl formate over heterogeneous catalysts. I. Activity and selectivity 165
Active sites
Oscillations during the interaction between carbon monoxide and oxygen on palladium-containing catalysts 31
Alkaline metal salts
Decarbonylation of methyl formate over heterogeneous catalysts. I. Activity and selectivity 165
Alkene metathesis
Metathesis of 1-alkenes in the liquid phase over a Re_2O_7/γ-Al_2O_3 catalyst. II. Kinetics of deactivation 213
Alkylation
Alkylation of phenol with methanol over Mn_3O_4 45
Alkylbenzenes
Some fundamental and practical aspects of the ammoxidation of alkylbenzenes 103
Alumina
Influence of coke formation on the aromatization of isophorone 141
Alumina
Selective oxidation of n-butane to maleic anhydride: A comparative study between promoted and unpromoted VPO catalysts 149
Ammoxidation
Some fundamental and practical aspects of the ammoxidation of alkylbenzenes 103
Aromatization
Aromatization of propane over a zeolite catalyst in both a microreactor and pilot plant 59
Aromatization
Influence of coke formation on the aromatization of isophorone 141
Balandin volcano curves
Kinetic interpretation of periodic trends in heterogeneous catalysis L1
Basic sites
Alkylation of phenol with methanol over Mn_3O_4 45
Basicity
Decarbonylation of methyl formate over heterogeneous catalysts. I. Activity and selectivity 165
Benzene hydrogenation
Partial liquid phase hydrogenation of benzene to cyclohexene over ruthenium catalysts in the presence of an aqueous salt solution. I. Preparation, characterization of the catalyst and study of a number of process variables 263
Butane oxidation
Selective oxidation of n-butane to maleic anhydride: A comparative study between promoted and unpromoted VPO catalysts 149
Calcium oxide
Vanadium mixed oxide catalysts for the oxidative coupling of methane 235
Carbon monoxide
Oscillations during the interaction between carbon monoxide and oxygen on palladium-containing catalysts 31
Carbon-covered alumina
Influence of coke formation on the aromatization of isophorone 141
Catalyst characterization (acidity, BET, Mossbauer spectroscopy, TPD, XRD)
Nonoxidative dehydrogenation of cyclohexanol over copper–iron binary oxides 201
Catalyst characterization (ESR, UV-visible, XRD),
Vanadium mixed oxide catalysts for the oxidative coupling of methane 235
Catalytic properties
Kinetic interpretation of periodic trends in heterogeneous catalysis L1
Chemical equilibria
Chemical equilibria and catalytic reaction of gas-phase methanol synthesis from methyl formate 15
Coke formation
Influence of coke formation on the aromatization of isophorone 141

Copper
Nonoxidative dehydrogenation of cyclohexanol over copper–iron binary oxides 201
Copper chromite
Chemical equilibria and catalytic reaction of gas-phase methanol synthesis from methyl formate 15
Copper/alumina
Influence of sulphur poisoning of copper/alumina catalyst on the selective hydrogenation of crotonaldehyde L7
Crotonaldehyde
Influence of sulphur poisoning of copper/alumina catalyst on the selective hydrogenation of crotonaldehyde L7
Cyclohexanol
Nonoxidative dehydrogenation of cyclohexanol over copper–iron binary oxides 201
Cyclohexene
Partial liquid phase hydrogenation of benzene to cyclohexene over ruthenium catalysts in the presence of an aqueous salt solution. I. Preparation, characterization of the catalyst and study of a number of process variables 263
Deactivation
Metathesis of 1-alkenes in the liquid phase over a Re_2O_7/γ-Al_2O_3 catalyst. II. Kinetics of deactivation 213
Decarbonylation
Decarbonylation of methyl formate over heterogeneous catalysts. I. Activity and selectivity 165
Decarbonylation
Chemical equilibria and catalytic reaction of gas-phase methanol synthesis from methyl formate 15
Dehydrogenation
Aromatization of propane over a zeolite catalyst in both a microreactor and pilot plant 59
Dehydrogenation
Nonoxidative dehydrogenation of cyclohexanol over copper–iron binary oxides 201
Difussional retardation
Partial liquid phase hydrogenation of benzene to cyclohexene over ruthenium catalysts in the presence of an aqueous salt solution. I. Preparation, characterization of the catalyst and study of a number of process variables 263
Disproportionation
Para-selectivity of zeolites with MFI structure: Difference between disproportionation and alkylation 51
Electron microscopy
High-resolution electron microscopy study of phosphorus-containing MoS_2/Al_2O_3 hydrotreating catalysts 251
Ethylbenzene
Hydrodealkylation reaction of ethylbenzene over a supported nickel–tungsten catalyst 75
Fourier-transform infrared spectroscopy
Surface modified niobium oxide catalysts: synthesis, characterization, and catalysis 179
Gallium-zeolite
Aromatization of propane over a zeolite catalyst in both a microreactor and pilot plant 59
Gasoline
Reforming of pyrolysis gasoline over platinum–alumina catalysts containing MFI type zeolites 1
Heat effect
Oscillations during the interaction between carbon monoxide and oxygen on palladium-containing catalysts 31
Hydrodealkylation
Hydrodealkylation reaction of ethylbenzene over a supported nickel–tungsten catalyst 75
Hydrogenation
Influence of sulphur poisoning of copper/alumina catalyst on the selective hydrogenation of crotonaldehyde L7
Hydrogenolysis
Chemical equilibria and catalytic reaction of gas-phase methanol synthesis from methyl formate 15
Hydrotreating catalysts
High-resolution electron microscopy study of phosphorus-containing MoS_2/Al_2O_3 hydrotreating catalysts 251
Hydroxycarbonate
Alkylation of phenol with methanol over Mn_3O_4 45
Iron
Nonoxidative dehydrogenation of cyclohexanol over copper–iron binary oxides 201
Isophorone
Influence of coke formation on the aromatization of isophorone 141

Kinetics
Metathesis of 1-alkenes in the liquid phase over a Re_2O_7/γ-Al_2O_3 catalyst. II. Kinetics of deactivation 213
Kinetics
Some fundamental and practical aspects of the ammoxidation of alkylbenzenes 103
Magnesium oxide
Vanadium mixed oxide catalysts for the oxidative coupling of methane 235
Magnetization
Effects of promoter oxides on the reduction of nickel oxide 87
Maleic anhydride
Selective oxidation of n-butane to maleic anhydride: A comparative study between promoted and unpromoted VPO catalysts 149
Manganomanganic oxide
Alkylation of phenol with methanol over Mn_3O_4 45
Metallosilicate
Para-electivity of zeolites with MFI structure: Difference between disproportionation and alkylation 51
Methane oxidative coupling
Vanadium mixed oxide catalysts for the oxidative coupling of methane 235
Methanol oxidation
Surface modified niobium oxide catalysts: synthesis, characterization, and catalysis 179
Methanol synthesis
Chemical equilibria and catalytic reaction of gas-phase methanol synthesis from methyl formate 15
Methyl formate
Decarbonylation of methyl formate over heterogeneous catalysts. I. Activity and selectivity 165
Methyl formate
Chemical equilibria and catalytic reaction of gas-phase methanol synthesis from methyl formate 15
Microreactor
Aromatization of propane over a zeolite catalyst in both a microreactor and pilot plant 59
Molybdenum
High-resolution electron microscopy study of phosphorus-containing MoS_2/Al_2O_3 hydrotreating catalysts 251
Nickel oxide
Effects of promoter oxides on the reduction of nickel oxide 87
Nickel–tungsten
Hydrodealkylation reaction of ethylbenzene over a supported nickel–tungsten catalyst 75
Niobium oxide
Surface modified niobium oxide catalysts: synthesis, characterization, and catalysis 179
1Octene
Metathesis of 1-alkenes in the liquid phase over a Re_2O_7/γ-Al_2O_3 catalyst. II. Kinetics of deactivation 213
Oscillations
Oscillations during the interaction between carbon monoxide and oxygen on palladium-containing catalysts 31
Palladium–cerium/alumina
Oscillations during the interaction between carbon monoxide and oxygen on palladium-containing catalysts 31
Palladium–cobalt/alumina
Oscillations during the interaction between carbon monoxide and oxygen on palladium-containing catalysts 31
Palladium/alumina
Oscillations during the interaction between carbon monoxide and oxygen on palladium-containing catalysts 31
Periodic trends
Kinetic interpretation of periodic trends in heterogeneous catalysis L1
Phenol
Alkylation of phenol with methanol over Mn_3O_4 45
Phosphorus
High-resolution electron microscopy study of phosphorus-containing MoS_2/Al_2O_3 hydrotreating catalysts 251
Pilot plant
Aromatization of propane over a zeolite catalyst in both a microreactor and pilot plant 59
Platinum–alumina
Reforming of pyrolysis gasoline over platinum–alumina catalysts containing MFI type zeolites 1
Promoter
Effects of promoter oxides on the reduction of nickel oxide 87

Promoters
Vanadium mixed oxide catalysts for the oxidative coupling of methane 235
Propane
Aromatization of propane over a zeolite catalyst in both a microreactor and pilot plant 59
Pyrolysis gasoline
Reforming of pyrolysis gasoline over platinum–alumina catalysts containing MFI type zeolites 1
Raman spectroscopy
Surface modified niobium oxide catalysts: synthesis, characterization, and catalysis 179
Reaction modifiers (salts)
Partial liquid phase hydrogenation of benzene to cyclohexene over ruthenium catalysts in the presence of an aqueous salt solution. I. Preparation, characterization of the catalyst and study of a number of process variables 263
Reactor kinetics
Aromatization of propane over a zeolite catalyst in both a microreactor and pilot plant 59
Redox additives
Some fundamental and practical aspects of the ammoxidation of alkylbenzenes 103
Reduction
Effects of promoter oxides on the reduction of nickel oxide 87
Reforming
Reforming of pyrolysis gasoline over platinum–alumina catalysts containing MFI type zeolites 1
Rhenium oxide/alumina
Metathesis of 1-alkenes in the liquid phase over a Re_2O_7/γ-Al_2O_3 catalyst. II. Kinetics of deactivation 213
Ruthenium
Partial liquid phase hydrogenation of benzene to cyclohexene over ruthenium catalysts in the presence of an aqueous salt solution. I. Preparation, characterization of the catalyst and study of a number of process variables 263
para-Selectivity
Para-selectivity of zeolites with MFI structure: Difference between disproportionation and alkylation 51
Selectivity (aromatics)
Aromatization of propane over a zeolite catalyst in both a microreactor and pilot plant 59
Selectivity (crotyl alcohol)
Influence of sulphur poisoning of copper/alumina catalyst on the selective hydrogenation of crotonaldehyde L7
Selectivity (cyclohexanone, cyclohexene, phenol)
Nonoxidative dehydrogenation of cyclohexanol over copper–iron binary oxides 201
Selectivity (maleic anhydride)
Selective oxidation of n-butane to maleic anhydride: A comparative study between promoted and unpromoted VPO catalysts 149
Sulphidation
High-resolution electron microscopy study of phosphorus-containing MoS_2/Al_2O_3 hydrotreating catalysts 251
Sulphur poisoning
Influence of sulphur poisoning of copper/alumina catalyst on the selective hydrogenation of crotonaldehyde L7
Surface modification
Surface modified niobium oxide catalysts: synthesis, characterization, and catalysis 179
Synthesis
Surface modified niobium oxide catalysts: synthesis, characterization, and catalysis 179
Temperature-programmed reduction
Effects of promoter oxides on the reduction of nickel oxide 87
Toluene
Para-selectivity of zeolites with MFI structure: Difference between disproportionation and alkylation 51
Tortuosity
Para-selectivity of zeolites with MFI structure: Difference between disproportionation and alkylation 51
Transition-based metal catalysts
Kinetic interpretation of periodic trends in heterogeneous catalysis L1
Vanadium
Vanadium mixed oxide catalysts for the oxidative coupling of methane 235
Vanadium pentoxide
Some fundamental and practical aspects of the ammoxidation of alkylbenzenes 103
VPO
Selective oxidation of n-butane to maleic anhydride: A comparative study between promoted and unpromoted VPO catalysts 149

Xylenes
Para-selectivity of zeolites with MFI structure: Difference between disproportionation and alkylation 51
3,5-Xylenol
Influence of coke formation on the aromatization of isophorone 141
Zeolites
Para-selectivity of zeolites with MFI structure: Difference between disproportionation and alkylation 51
Zeolites
Reforming of pyrolysis gasoline over platinum–alumina catalysts containing MFI type zeolites 1
Zeolites
Aromatization of propane over a zeolite catalyst in both a microreactor and pilot plant 59
Zinc sulphate
Partial liquid phase hydrogenation of benzene to cyclohexene over ruthenium catalysts in the presence of an aqueous salt solution. I. Preparation, characterization of the catalyst and study of a number of process variables 263
ZSM-5
Para-selectivity of zeolites with MFI structure: Difference between disproportionation and alkylation 51
ZSM-5
Reforming of pyrolysis gasoline over platinum–alumina catalysts containing MFI type zeolites 1
